

Project Profile

Equinox-Hawthorne Fitness Center

Building Use: Fitness Center

Scope of Work: Single Ply Roofing and Waterproofing

Project Data

Location
Hawthorne, CA

General Contractor
EPI Construction

Project Value
\$327,500

Completion Date
August 2009

BEST was selected to install roofing and waterproofing for this job. The project consisted of removing the existing roofing system down to the lightweight concrete deck, fully adhering 5/8" DensDeck and an 80 mil thick PVC roofing system to approximately 28,500 square feet total roof area. The new system is in compliance with California Building Code Title 24 Part 6 meeting solar reflectance and thermal emetine standards. A between-slab waterproofing membrane was installed around the pool and under the basketball court.

Between Slab Membrane installed over concrete deck
