Design enhances façade outlines

CO Architects and SRG Partnership Inc. specified a customized rainscreen for **Shriners for Children Medical Center** in Pasadena, Calif. It features dark colored in-fill and jointed corners designed to enhance the outlines of the façade (many systems wrap corners).

Best Contracting Services Inc. installed 25,000 square feet of DAMS Inc.'s 0.09-inch 3003 aluminum plate CPRS Rainscreen Plate Panel System. The rainscreen panels were produced with a three-coat Kynar metallic finish in eight custom colors: two Silvers, Space Silver, Steel City Silver, Silver Gray, Silver Shadow, Medium Gray and Pewter. Additionally, Best Contracting Services installed DAMS Incorporated's CPCC Aluminum Plate Column Covers.

The 74,800-square-foot Shriners for Children Medical Center is located on a 2-acre site. It houses 20 outpatient clinic examination rooms, six rooms with post-anesthesia care units, three fitting rooms for prosthetics and orthotics, two ambulatory surgery rooms, care coordination departments and a pharmacy. The \$77 million project was completed in April 2017.

Owner: Shriners International, Tampa Fla.

Architects: CO Architects, coarchitects.com, and SRG Partnership Inc., Portland, Ore., www.srgpartnership.com

General contractor: DPR Construction Inc., Pasadena, Calif., www.dpr.com
